Science Experiences That Come To You[™]

Science Teacher – Part Time

Job Description:

Come join our High Touch High Tech team to provide hands-on science programs for children from pre-school through 5th grade inside and outside the school environment. Our science programs go to the customers site and are safe, age appropriate, and totally participatory. In-school field trip programs complement the Texas Essential Knowledge and Skills (TEKS) objectives. This position will have the responsibility of teaching in pre-schools, elementary schools, after-school, special events, camps, and birthday parties.

This is the job that every teacher who dreams of engaging and stimulating young minds is looking for: the opportunity to practice and excel in the science educational environment but without the bureaucracy; like being the grandparent rather than the parent.

A-do-what-ever-it-takes attitude is essential for teaching and assisting with logistical, administrative, marketing, and sales needs while the business is growing.

The successful candidate will be able to captivate the classroom with the wonders of science and demonstrate effective classroom management skills. Degreed teachers, scientists, and professionals at all experience levels with an enthusiastic attitude are candidates for success.

High Touch High Tech[®]

Science Experiences That Come To You[™]

Description of Work:

Facilitate science experiments inside and outside the classroom so that children can explore, manipulate and use the program content for learning and imaginative play.

Use early childhood and elementary school level education techniques; communicate visually, verbally, and with body language to maximize the learning experience. Adapt teaching methods to address the classroom environment. Be a role model.

Showing up on time for programs, reliability, and dependability are essential.

Instruct and monitor students in the use and care of equipment and materials, in order to prevent injuries or damage.

Establish and enforce rules for behavior and maintain order in the classroom.

Prepare students for life by encouraging them to explore learning opportunities and to persevere with challenging tasks.

Select, store, order, issue, and inventory equipment, materials, and supplies.

The Candidate Should Possess:

Knowledge of principles for describing force, motion, energy, matter, light, the processes of plant and animal life, the environment, earth, space, and chemistry, along with the history and personalities associated with each.
